

WHO WE ARE

DAN EBY

Dan Eby joined Sierra Hamilton in 2014 to start Blowout Engineers, Sierra Hamilton's well control engineering service. He has 35 years of experience, 20 of which are in well control. He has experience in all facets of well control including well capping, killing, relief well drilling, and snubbing. He also has extensive experience in all areas of pre-event well control engineering, such as dynamic kill design, emergency response planning, and critical well planning and operations.

Prior to joining Sierra Hamilton, Dan worked for major well control service providers in engineering and operations management. He also has major operator experience with Tenneco, Chevron, and ConocoPhillips in drilling. Dan has worked in more than 40 countries and holds Bachelor of Science degrees in both Building Construction and Civil Engineering. Dan is a licensed professional engineer in the state of Texas.
